Practical Ideas and Strategies

Students with attention-seeking and manipulative behaviors are becoming more and more prevalent in our schools. These students are exceedingly difficult to reach and even more difficult to teach. They often exhibit severe and disruptive behavior patterns, infringe on others' rights, disrupt the classroom and stop their own learning as well as that of others. This outstanding seminar by **JULIE COMPTON** is designed to offer grades 3-12 educators powerful tools and techniques for changing students' negative behaviors into positive, productive learning behaviors. We will share classroom-proven ideas, techniques and strategies that have been successfully used with students like yours for many years. The practical ideas and fun, interactive style will keep you excited and entertained as you learn valuable, new strategies that work. You will leave this seminar with many highly effective and game-changing ideas you will be able to use immediately with your attention-seeking and manipulative students.

A Message From Seminar Leader, Julie Compton

Uniquely Qualified Instructor

JULIE COMPTON is a highly experienced educator and practitioner with proven expertise working directly with challenging, defiant students. Her extensive experience across time and grade levels gives her an incredibly unique perspective. The transparency with which she approaches teachers makes her very relatable and trustworthy. Julie presents in a way that gets to the heart of the matter and addresses disruptive behaviors of students seeking attention in the classroom. You will walk away with highly practical strategies you can immediately implement in your classroom.

Dear Colleague:

Student behaviors are changing. Many students come to school hurting, hostile, unmotivated, and uninterested in school. We, as educators, often spend 80% of our time with 20% of the class who are defiant, disrespectful and off-task. You are invited to attend this highly practical seminar focused on strategies for attention-seeking, manipulative and difficult-to-teach students. During the day, you will discover many new ideas for reaching even your most difficult and defiant students.

Many students act out because it has worked for them in the past. They either do not possess the appropriate skills to make good choices or have been reinforced for making the wrong choices. This seminar is designed specifically for teachers, counselors, social workers, administrators, and school psychologists dealing with defiant and hard-to-reach students. The skills I will share were gained through personal experience as an educator for several decades and from interactions with many highly skilled educators over the years. I have seen students who were engaged in constant attention-seeking behaviors to those with severe physical aggression change and grow when the correct intervention skills were applied.

The goal for this day is for you to leave the seminar with many new, practical tools that can help you with addressing student behaviors that threaten to stop our teaching, interfere with our students' learning and steal your joy as an educator. Please join your colleagues and me for an exciting day filled with practical and creative strategies for changing the lives of your students and refilling your teacher toolbox.

Sincerely,

Julie Compton

P.S. You will leave this seminar with **dozens of practical ideas and an extensive digital resource handbook** to help you implement the strategies in your classroom immediately!

"You are invited to attend this highly practical seminar focused on strategies for attention-seeking, manipulative and difficult-to-teach students ... discover so many new ideas for reaching even your most difficult and defiant students."
