Gain a wealth of practical strategies for boosting reading, writing and spelling achievement, and increasing students' confidence. Drawing on cutting-edge research and MRI brain studies, Pamela will explore how and why dyslexia develops, and present a wealth of practical strategies, techniques and activities you can use to help activate and strengthen specific reading, spelling and language circuits in the brain. **Enhance your instruction and help your ELL students who have or may have dyslexia experience success in reading, writing and spelling. Join literacy expert Pamela Fuenzalida for a fast-paced, engaging day of learning!**

A Message From Seminar Leader, Pamela Fuenzalida

Uniquely Qualified Instructor

PAMELA FUENZALIDA is an outstanding educator with 16 years of experience centered around ELL students as a classroom teacher, and an ELL dyslexia specialist. With endorsements in general ed, special ed, and bilingual ed, she has worked extensively with ELL students diagnosed with dyslexia. Pamela understands the realities and challenges that teachers face as they strive to help children with reading impairments. She is passionate about helping struggling learners and students with disabilities reach high levels of learning, as well as equipping their teachers with cutting-edge, highly effective literacy practices. Pamela is the author of *English Language Learners and Dyslexia: Practical Strategies That Work (Grades K-5)*, the extensive digital resource handbook all participants will receive. **Pamela's seminars are practical, inspiring, and filled with strategies, activities and teaching techniques you can use immediately to help ELL students with dyslexia and ALL bilingual students become better readers, writers and spellers.**

Dear Colleague:

Teaching ELL students is extremely rewarding. It also brings many challenges especially when they struggle despite all their effort and hard work. Fortunately, research exploring the connections between cognition, brain structure and learning clearly shows us how reading works in the brain, why some children develop reading impairments and dyslexia, and most importantly, what we can do to support and accelerate the learning of ELL students who have dyslexia.

Join me for a day designed to equip you with practical tips and ideas that focus and enhance the instructional techniques, learning strategies and classroom activities you use in your literacy program to support ELL students who have or may have dyslexia. All the strategies I will share not only help these students to build better functioning neural pathways, but can help all of your readers to excel and achieve.

The knowledge, strategies, activities and assessments you gather in this seminar will help you teach and empower ELL students who have or may have dyslexia to be more successful readers, writers and spellers. And because I know firsthand that teachers are some of the busiest people in the world, everything I present is practical and time efficient.

I look forward to spending the day with you, exploring how to maximize your instruction so it supports English Language Learners with dyslexia, while strengthening the learning of your typically developing students. Now, more than ever, science has shown us how to help children with reading impairments. New understandings about how the brain works have given us an opportunity to reexamine literacy and its component parts. How fortunate we are to have this opportunity. I look forward to meeting you at my seminar!

Sincerely,

Pamela Fuenzalida

P.S. If you are interested in gaining knowledge, strategies, and activities that will positively impact the reading achievement of your ELL students, this is the seminar for you.

'The knowledge, strategies, activities, and assessments you gather in this seminar will help you teach and empower ELL students who have or may have dyslexia to be more successful readers, writers and spellers.'
