Dear Colleague:

When I first became aware of how Generative AI could assist me as a language teacher, I was absolutely fascinated. The kind of fascination where your jaw immediately drops, and you are mesmerized by the powers of this incredible tool that is instantly creating content for you – right before your eyes! As the AI magic happened within seconds, I knew this was going to be a game-changer to my teaching practices, and to the way my students would learn world languages going into the future. I learned how to benefit from Generative AI in ways that make my teaching life easier, and help my students learn with more enthusiasm and engagement.

Embracing Generative AI as a world language teacher isn't about replacing tried and true instructional methods – it is about supercharging them. It's about creating personalized lessons on-the-spot, providing students with a one-on-one conversational partner instantly or differentiating content to ensure that all students are successful. Tasks that seemed very time consuming now have become much easier to create, ultimately giving time back to focus on my students and their language learning experience. Our language classrooms will evolve thanks to Generative AI Tools, and it's up to us to harness its power, grow our own AI literacy and better equip our students for their future.

As world language teachers, we have the power to ignite curiosity, instill a love for language learning, and cultivate the skills necessary for success in an ever-evolving global society. Using readily available Generative AI tools makes it that much easier, and honestly, even more fun! I'm thrilled to present this new one-day seminar to share with you the latest AI advancements and how they can transform your language classes like they did mine. Join me for this one-day seminar! You'll leave inspired, equipped, and ready to leverage the power of AI in your own classroom.

Sincerely,

Noemí Rodríguez
