Leave with concrete, teacher-friendly methods, resources and digital supports to add to your dyslexia toolbox that you can utilize tomorrow.***

# A Message From Seminar Leader, Andrew Stetkevich

## Uniquely Qualified Instructor

**ANDREW STETKEVICH** has more than 38 years of experience as a K-12 educator in the field of special education and literacy intervention. Experienced as a classroom teacher, special education program specialist, beginning teacher support provider, parent educator, and staff development specialist, Andy is also a nationally endorsed Project Read Professional Development Consultant and an active member of the International Dyslexia Association. A sought-after speaker at numerous national and international dyslexia conferences, Andrew is the author of *DYSLEXIA: Best Strategies for Students Who Struggle to Successfully Read, Write and Spell (Grades K-6)*, the extensive digital resource handbook each participant will receive at the seminar.

Dear Colleague:

As most states now have dyslexia regulations in place, educators must be knowledgeable on how to identify and teach students with dyslexia so they can make a well-informed, positive impact on the education of their students. I have planned this seminar to share with you the most current research-based strategies, structured literacy instructional approaches, accommodations, and scaffolds to support the achievement of students with dyslexia. We will analyze the symptoms associated with dyslexia as well as important areas to assess in determining if a student is dyslexic. We will examine what is meant by “structured literacy” methods which are designed to effectively address the needs of students with dyslexia. I will share with you explicit, direct, multisensory strategies to enhance your instruction of foundational reading skills. You will walk away from the seminar with strategies that will benefit students with dyslexia as well as other students who may have difficulty in mastering foundational reading skills.

In my 38 years of teaching students with learning disabilities, including many students with dyslexia, I have learned two important principles that help teachers make a positive impact on the education of their students. First, educators must foster their ability to build a positive rapport with each of their students. Second, educators must continually add to their toolbox the resources and instructional methods that support all learners. ***Whether your instruction is in-person, online or in a hybrid learning environment you’ll leave with many innovative ideas, research-based practices and powerful instructional strategies to add to your teaching toolbox.***

Sincerely,

Andrew Stetkevich

P.S. This seminar is designed to provide you with **practical ideas and tools** that will help you to achieve the goal of improving the literacy skills of all your students, with a focus on the unique needs of your students with dyslexia.

*“I will share with you the most current research-based strategies, structured literacy instructional approaches, accommodations, and scaffolds to support the achievement of students with dyslexia.”*
