Practical Ideas and Strategies

You've heard of MINDFULNESS but are wondering how you can incorporate mindfulness practices into your already busy school day in ways that will actually make a difference for you and your students. Join outstanding and motivating national speaker, **MaryAnn Brittingham**, in this full-day, idea-packed seminar that focuses on practical and doable strategies to increase your students' mindfulness to help them find greater school success. Many challenging and disruptive behaviors are caused by lack of awareness and understanding of how the brain works. Once we teach students mindfulness practices, they will be better equipped to self-regulate, recognize and handle the emotions that cause the behaviors that get them in trouble in class and socially. In addition, these mindfulness practices will enhance students' ability to focus during instruction, which can result in higher achievement. You won't want to miss this opportunity to gain innovative and new ways to reduce challenging behaviors that get in the way of your teaching and students' learning.

You will leave with numerous strategies to teach students to be more aware of their emotions, reactions and frustrations that impact their ability to focus and increase learning and success in school.

A Message From Seminar Leader, MaryAnn Brittingham

Uniquely Qualified Instructor

MaryAnn Brittingham is a highly experienced teacher, leading expert in working with students who have challenging behaviors in a variety of settings, and a national presenter on using MINDFULNESS practices in the classroom. MaryAnn is known for her motivational seminars that not only inspire, but give teachers the specific strategies they need to make positive changes to increase students' success in school, both academically and socially. She is the author of many books, including *Transformative Teaching: Changing Today's Classrooms Culturally, Academically & Emotionally*; *Respectful Discipline*; *Motivating the Unmotivated*; *Working with Difficult Parents*; and *Strengthen Students' MINDFULNESS: Increase Your Students' Self-Control While Reducing Anxiety and Challenging Behaviors*, the resource handbook you will receive. MaryAnn focuses on practical solutions for helping students be successful in school – socially and academically. She brings to the seminar not only her extensive knowledge of mindfulness and the science behind it, but strategies and ideas you can use to help your own students understand and use the practices themselves.

Dear Colleague:

When you ask someone to name a person who has had a lasting impact on their life, it is often a teacher whom they felt respected them and took an interest in helping them see their potential. This is a powerful opportunity we, as educators, have to make a meaningful and lasting impact on young lives. But students are changing. Coming to school less prepared, more anxious, and less able to focus, students are unmotivated and unable to see the value of school in their own lives. All of these can cause difficult behaviors that make teaching less rewarding and more challenging. A practical and real solution to some of these critical issues is to incorporate mindfulness practices into our daily routines to help students become aware of their emotions and begin to increase self-control, attention and emotional regulation that will help them be more successful students. This seminar is all about how to do just that!

This strategy-packed day will cover dozens of strategies, ideas and activities you can use to teach mindfulness in ways that will make a significant difference for your students. These strategies will help students strengthen the connectivity between areas of the brain that support attention and concentration, thus weakening the amygdala's capacity to hijack the thinking parts of the brain when in an anxious or stressed state. With this awareness, it is easy to see how mindfulness and self-regulation can translate into improved learning. This is true for all students, but especially the most vulnerable ones.

For our students who have difficulty dealing with negative emotions, fear and anger can hit them unexpectedly. Without a plan for dealing with these feelings, they can be thrown off and may react negatively. Teaching them how their brain works and how to put mindfulness practices into action will help them make better decisions. In addition, students can learn to regain access to their executive functions even when in a stressed or anxious state.

I hope you will join me and your colleagues for an action-packed, motivating day that will equip you with strategies and the inspiration to make mindfulness a part of your everyday teaching in order to increase your students' school success!

Sincerely,

MaryAnn Brittingham

P.S. The focus of this seminar will be on **key, practical strategies to decrease student anxiety and challenging behaviors** using mindfulness practices.

"This strategy-packed day will cover dozens of strategies, ideas and activities you can use to teach mindfulness in ways that will make a significant difference for your students."

What Your Colleagues Say About MaryAnn Brittingham
