Ten Key Benefits of Attending

"Great information that is motivating and refreshing! Thanks for the good, practical ideas that will be easy to use!"

– STACY ANGERMEIER,
OCCUPATIONAL THERAPIST

Who Should Attend

Educators and Therapists
Serving Children
In Preschool and
Kindergarten: Classroom
Teachers, Preschool Staff,
Special Education Staff,
Occupational Therapists,
Speech-Language
Pathologists, Psychologists,
Social Workers,
Instructional Aides,
and Administrators

- 1. Achieve Success with Your Most Challenging Young Students**
Learn how to implement practical, research-based strategies that enable students to focus on learning ... Explore behavioral and sensory processing techniques that work especially well for students with a wide variety of special needs, from ADHD to autism
- 2. Learn Strategies to Increase Positive Behavior and Social Skills**
Classroom-proven techniques to guide your students' compliant behavior from the first day of school or therapy using integrated behavioral, brain-based sensory integration, mindfulness and movement activities
- 3. Engage Young Children with Special Needs in Active Learning**
How to use creative strategies, developmentally sequential activities, and effective environmental adaptations to enhance your teaching or therapy time ... Techniques to make the most of every activity you do with your students
- 4. Help Your Students Develop Self-Control**
Step-by-step demonstrations for using routine-embedded activities in a variety of settings to promote the development of attention, self-control, social skills, and sensory processing skills of young students with special needs
- 5. Use the Best Instructional Strategies for Each Child**
Learn practical, efficient ways to determine the impact of children's cognitive, behavioral, sensory processing, visual-perceptual, and fine motor skills on their ability to learn ... How to design the best teaching and therapy approaches based on this information
- 6. Increase Participation in Learning Activities**
Key steps for improving the attention span, sensory integration, motor planning, and learning abilities of young students with special needs ... Best methods for using adaptive equipment and environmental modifications to enhance learning
- 7. Provide the Best Start for Learning**
Support all your learners using proven, research-based practices to establish a therapy or classroom environment in which all children can thrive ... How to prevent behavior problems and meet the needs of children with atypical learning styles in your classroom
- 8. Teach Drawing and Printing to Children Who Can't Sit Still**
Discover multi-sensory strategies to develop the emerging graphomotor skills of young children with special needs ... Practical, classroom-proven ideas that work
- 9. Gain Meaningful Support from Parents**
Powerful strategies to develop positive team relationships with parents ... How to support parents who demonstrate serious challenges ... Step-by-step techniques to minimize the impact of family crisis on a child's learning
- 10. Ideas, Ideas and More Ideas!**
Demonstrations, songs, stories, art, puppets, and games that improve attention, self-control, behavior, and sensory processing skills of young children ... Video footage of case studies, environmental adaptations and dozens of interventions to enhance your teaching or therapy program **(You will receive an extensive digital resource handbook)**

Outstanding Strategies You Can Use Immediately

What You Will Learn ...

- How to implement **practical, research-based movement strategies** that enable students to focus on learning
- **Specific positive behavioral support strategies** to prevent and reduce aggressive behavior
- **Classroom-proven techniques** to guide your students' successful behavior from the first day of school or therapy
- **Proven strategies for using brief routine-embedded movement breaks** to promote self-control, sensory processing and social skills
- **A wealth of activities** to help young children appropriately manage their strong feelings
- How to use songs and games to **improve your students' attention, behavior and self-control**
- **The keys to encouraging and supporting appropriate participation** in classroom and therapy learning activities
- **Dozens of innovative ways** for making the most of every activity you do with your students
- **Powerful strategies** to develop positive team relationships with parents
- **Step-by-step techniques** to minimize the impact of family crisis on a child's learning
- **Effective ways** for using developmentally appropriate physical, visual and verbal prompts to teach young children
- **Activities, ideas and effective games** to promote children's self-control, initiative and attachment
- **Numerous practical and ready-to-use** activities that teach direction-following and movement-planning skills
- Ideas for adapting your teaching or therapy environment to **improve attention and behavior**

"What a wonderful, engaging speaker with many practical, realistic examples of strategies for helping all children!"

– CAROL NEFF, BEHAVIOR INSTRUCTIONAL SPECIALIST

Practical Ideas and Strategies

Young children are increasingly demonstrating a combination of developmental, behavioral, mental health, and sensory integration disabilities. How can we, as teachers and therapists, effectively identify, understand and address these combined challenges in order to maximize learning for students with special needs? In this cutting-edge seminar **JOHN PAGANO** will share a wealth of practical strategies that simultaneously address the uniquely combined developmental, behavioral and sensory integration challenges of young children. Using humor, demonstrations and video clips of his work with preschool and kindergarten students in a variety of settings, John will share successful strategies for improving the behavior, sensory integration, learning, and developmental skills of these children and he will present easy-to-administer assessments that will help you address the specific behavioral and sensory integration challenges of young children with special needs. In addition, you will receive ready-to-implement ideas to organize your classroom or therapy sessions, manage and reduce aggressive behaviors and implement practical sensory integration techniques. **You will leave this outstanding seminar with dozens of practical ideas and strategies to help your students make significant gains in their behavior, sensory processing and learning skills.**

A Message From Seminar Leader, John Pagano

Uniquely Qualified Instructor

Dr. JOHN PAGANO, OTR/L has been a teacher and pediatric therapist for over twenty-five years, working with young children with developmental, behavioral and sensory integration challenges in a variety of settings. He currently works full time in birth-to-three clinics, preschool, kindergarten, and mental health school settings. As a licensed occupational therapist with degrees in early childhood special education and family studies, John brings extensive knowledge and understanding of early intervention strategies for working successfully with young children with special needs. He is also the author of *Powerful Early Intervention Strategies to Help Young Children with Developmental Problems and Challenging Behaviors*, the extensive digital resource handbook you will receive at the seminar. As a teacher, therapist, national presenter, and parent, John is recognized most for his sense of humor and deep concern for children with behavioral, developmental and sensory integration challenges. **You will leave this seminar with a wealth of practical ideas, strategies, activities, and tips for helping your challenging young students with disabilities.**

Dear Colleague:

Understanding the special needs of young children with developmental, behavioral and sensory integration challenges and enhancing their skills to learn is a common goal of both teachers and therapists. However, when we are faced with a growing number of children who demonstrate a combination of these challenges, our job can often seem overwhelming. This seminar is designed to help you identify, understand and address these combined challenges in order to maximize learning for young children with special needs.

During the day I will give you a wealth of practical strategies that you can implement immediately in your own classroom or therapy program. The ideas I will share are classroom-proven, based on recent research and highly effective in improving the attention, behavior and social skills of young children with developmental disabilities and challenging behaviors. I have used many of these strategies on a daily basis in my work with countless students over the past twenty-five years.

I will give you powerful ways to help your students develop self-control, reduce their aggressive behavior, manage their strong feelings, participate appropriately in learning activities, increase their attention span, and improve their ability to take appropriate initiative.

With the support of video demonstrations, hands-on examples, songs, games, and innovative learning activities, I will give you practical, step-by-step ideas to greatly enhance your success in working with young children with developmental, behavioral and sensory integration challenges.

Please join me for an exciting day filled with ideas you can use immediately.

Sincerely,

John Pagano, PhD, OTR/L

P.S. Again, the focus of our day together will not be on theory but on **practical strategies and ideas** that are classroom-proven.

"During the day I will give you a wealth of practical strategies that you can implement immediately in your own classroom or therapy program."

What Your Colleagues Say About John Pagano

"Excellent material and extremely well presented! I highly recommend this seminar for everyone who works in childcare facilities."

Maxine Crowder-Wilson,
Executive Director of Child Development Center

"What wonderful insights – research based and delivered in an animated, relevant and practical way!"

Thea Wilson, Resource Teacher

"Great information for dealing with children with challenging behaviors! Thanks."

Kay Morgan, Physical Therapy Assistant

"I received a lot of practical ideas that can be used in classrooms with children of any ability range."

Rebekah Link, Preschool Teacher

"The information John presented is extremely valuable and the skills I learned will benefit all our children in early childhood education."

Stephanie Pearson, Social Worker

"Excellent! This seminar was very informative and provided information that can be used on a daily basis."

Kristi McCormick, Speech-Language Pathologist

"John offered wonderful tools for use with the students I work with. Excellent information and a highly skilled presenter!"

Laura Lambert, Social Worker

"John works in the real world and gave us strategies that will really work. Thanks for the practical ideas with research to back them up!"

Leah Qualls, Kindergarten Teacher

Special Benefits of Attending

"Excellent presentation that was highly engaging and loaded with valuable information! I highly recommend it!"

ASHLEY DEATON,
OCCUPATIONAL THERAPIST

On-Site Training

Most BER seminars can be brought to your school or district in-person or online. See the options at www.ber.org/onsite or call 877-857-8964 to speak to one of our On-Site Training Consultants.

Extensive Digital Resource Handbook

You will receive an extensive digital resource handbook giving you access to countless strategies. The handbook includes:

- Specific activities, strategies and ideas to improve young children's attention and behavior
- Proven techniques to encourage and support appropriate participation in classroom and therapy activities
- Suggestions for using developmentally appropriate physical, visual and verbal prompts to teach young children
- Multi-sensory strategies to develop the emerging graphomotor skills of young children with special needs
- Songs, games and a wealth of movement activities to improve the self-control and sensory processing skills of young children
- Many fun and easy-to-implement strategies for accommodating the sensory differences of students in your classroom
